

IT Procurement Policy

Version 1.4

Owner: James Rivera

Department: Operations

Internal document. Readable by all employees.

§1.0 — Scope

This policy governs the purchase, assignment, and recovery of information technology assets across Acme Corporation, including laptops, mobile devices, peripherals, and software licences.

§4.3 — Purchase Authorization

All IT purchases above \$1,000 require manager and director dual approval. Purchases above \$5,000 require CFO sign-off.

Purchases below the \$1,000 threshold may be approved by the requesting employee's reporting manager alone. Splitting a single purchase into multiple smaller orders to avoid a threshold is prohibited.

§8.1 — Asset Recovery

Terminated employees must return all issued hardware and access credentials no later than their final day of employment. Failure to return equipment within 24 hours of termination will result in payroll deduction.

IT Operations maintains the asset register and is responsible for confirming recovery. Devices are wiped and re-imaged before reassignment, and any device not recovered within thirty days is reported as lost and remotely disabled.
